

## Class 390 Pendolino Vibration testing

In December 2007 TestPRO Limited carried out a series of tests on a Class 390 Pendolino vehicles operated on the West Coast Main Line (WCML) by Virgin trains and were originally supplied by ALSTOM Transport, Birmingham.

TestPRO limited was asked to carry out a track test programme as specified by ALSTOM Transport WCML who provide maintenance and at Longsight depot, Manchester.

The object of testing was to determine the levels of acceleration experienced by equipment during a representative track test between Manchester and Stafford.

TestPRO Limited is delighted to have supported this project by providing a cost effective testing service.
